The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 47-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 47 & 49, there is no positive antecedent basis for "said integer part", "said first decimal place" or "said second decimal place".

Claims 24-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-24 of copending Application No. 10/834,864. Although the conflicting claims are not identical, they are not patentably distinct from each other because as noted by the Federal Circuit in *Eli Lilly v. Barr*, "[a] a patentable distinction does not lie where a later claim is anticipated by an earlier one." See also *In re Berg* and *In re Goodman* which established that a later genus claim limitation is anticipated by, and therefore not patentably distinct from, an earlier species claim.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 24-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-24 of copending Application No. 10/835,435. Although the conflicting claims are not identical, they are not patentably distinct from each other because as noted by the Federal Circuit in *Eli Lilly v. Barr*, "[a] a patentable distinction does not lie where a later claim is anticipated by an earlier one." See also *In re Berg* and *In re Goodman* which established that a later genus claim limitation is anticipated by, and therefore not patentably distinct from, an earlier species claim.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van*

Application/Control Number: 09/650,858

Art Unit: 2653

Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8, 9, 51 and 52 are allowed.

Claims 24-26 would be allowable if a terminal disclaimer is timely filed as explained above.

Claims 27-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 47-50 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: regarding new claims 51 & 52, the prior art of record considered as a whole fails to teach or suggest a method of determining recording and/or reproducing information of a recording medium for use with respect to a recording and/or reproducing apparatus, the method comprising: reading an <u>extended part version information provided in eight bits</u> of a physical format information zone of a lead in area of the recording medium; and determining the recording and/or reproducing information of the recording medium for use with respect to the recording and/or reproducing apparatus according to the read extended part version information. (bold/underlined language emphasized)

Any inquiry concerning this communication should be directed to Paul Huber at telephone number 571-272-

7588.
